PROFESSIONAL SUMMARY

Motivated and detail-oriented final year B.Tech Computer Science student with a strong foundation in software concepts and a growing passion for data analytics. Currently pursuing a professional certification in Python with Data Analytics. Demonstrated ability to collaborate in teams, contribute creative ideas, and deliver results through hands-on academic projects. Eager to bring analytical thinking, adaptability, and a strong work ethic to an entry-level Data Analyst role.

EDUCATION

Bachelor of Technology — Computer Science & Engineering	July 2026 (Expected)
<i>Rajiv Gandhi College of Engineering Research & Technology, Chandrapur, Maharashtra</i> CGPA: 7.2	
Higher Secondary Certificate (HSC) — State Board	2022
<i>Yashwant Maha Vidhyalaya, Wardha, Maharashtra</i>	
Secondary School Certificate (SSC) — State Board	2020
<i>Yashwant Vidhyalaya, Wardha, Maharashtra</i>	

CERTIFICATION & TRAINING

Python with Data Analytics	Mar 2026 – Aug 2026 (In Progress)
<i>The Kiran Academy, Pune, Maharashtra (6-Month Professional Course)</i>	
- Learning Python programming for data manipulation, analysis, and visualization - Covering libraries such as Pandas, NumPy, and Matplotlib for real-world data workflows - Building foundational skills in data cleaning, reporting, and analytical problem-solving	

ACADEMIC PROJECTS

Generative Visual Content & Editing Suite	Final Year Project Team of 5
- Developed an AI-powered web platform enabling users to create & edit professional visual content using text prompts — eliminating the need for design skills - Contributed to project ideation, creative direction, technical execution, and final presentation delivery - Strengthened skills in team collaboration, problem-solving, and project communication	
Live Object Detection using Python	Mini Project Team of 3
- Built a real-time object detection system using Python, leveraging CNN-based models including YOLO for object identification and labeling - Utilized Python libraries for image processing and model integration; contributed to ideation, execution, and project presentation	

TECHNICAL & PROFESSIONAL SKILLS

Programming:	Python (Learning), Basic C/C++
Data Tools:	Pandas, NumPy, Matplotlib (Fundamentals — In Progress)
Concepts:	Data Analytics Fundamentals, Object Detection (CNN/YOLO), AI-based Web Applications
Soft Skills:	Team Collaboration, Communication (English – Actively Improving), Creative Thinking, Event Management
Tools:	MS Office, Google Workspace, LinkedIn

CO-CURRICULAR & EXTRACURRICULAR ACTIVITIES

Association of Computer Technocrats (ACT) — Active Member
- Contributed to organizing and managing college-level technical and sports events, developing leadership and coordination skills - Volunteered in social activities, demonstrating community engagement and a collaborative attitude

Interests: Classical & Contemporary Dance, Singing — reflect creativity, discipline, and expressive communication
